Subject: TV program on demand

For a couple of years now viewers have been able to watch the TV program online as it was streamed by some of our affiliate TV stations. Because it was a stream of a live broadcast, they did have to be at their computer at the time the program aired.

Now the program can be watched anytime at www.obxtv.com and as often as they wish.

A laptop hooked up to HDTV via an HDMI cable looks as good as a program coming in off the cable. One of the great things is, viewers, many of which could be visitors or future business owners in **Northeast North Carolina**, can now see the program anywhere in the world.

Go to www.obxtv.com and click on "Watch OBXTV" Hit the start arrow for the program of the week or go to Channel 1 and pick the shows uploaded so far that you would like to see. You will see **links to our sponsors** on the "Watch OBXTV" page.

Thanks you for your support
